## Quick 861DA Rework Station

### Features

1. Three regular channels are "CH1", "CH2" and "CH3". Each channel's parameters including temperature and airflow can be set.
2. Password protection and key-lock functions.
3. Real time operation by the magnetic switch. It will enter sleeping state when the handle is placed on holder.
4. Auto sleeping function. Parameters can be set in sleeping state.
5. Closed loop sensor. Temperature can be controlled by zero voltage triggering modes, and adjusted conveniently, accurate and stable, not affected by airflow.
6. Large power, rapid heating.
7. A multipurpose unit, having brushless whirlpool motor, wide range and step-less adjustable airflow.
8. An automatic cooling system can prolong the life time of heating element and protect the handle.

### Specifications

Power	1200W
Voltage	220V 50/60HZ
Temperature Range	100°C-500°C
Airflow Range	6-200
Max Airflow	200L/min
Size(L*D*H)	188(L)*245(D)*135(H)mm
Weight	3.65kg
